name, title, organization, position address, and phone/fax, email

If you need special accommodations due to a disability, please notify Congressman
Rohrabacher's district office at least 7 days in advance of the forum

CONFIRM YOUR REGISTRATION STATUS BY PHONE OR EMAIL

Course Description

This is an 8-hour seminar of interactive discussion and presentations. It is designed to help healthcare management professionals - including physicians and nurses with management responsibility - assess, mitigate and deal with the medical, physical and economic risks and challenges associated with terrorism involving weapons of mass destruction. The course analyzes, from the hospital perspective, the most significant aspects of preparing for and responding to such an event. This interactive seminar may also benefit fire, emergency medical service, law enforcement and emergency management personnel responsible for coordinating community and hospital response to a terrorist attack or other major emergency.

Intended Audience

The course is intended for hospital executive and middle managers (e.g., service line and department heads) from all components of the hospital: clinical, clinical support, facilities and administrative. Community emergency managers are a welcome additional audience. Clinicians are welcome to attend, although they should understand it is NOT a clinical course.

Course features and topics

- Legal and financial impacts, in addition to clinical considerations, of major terrorist events
- JCAHO requirements for hospitals providing care to victims of hazardous materials incidents
- Hospital liability issues related to hazardous material incidents and major crimes
- Special hazards to healthcare institutions posed by biological, chemical and radiological incidents
- Accessing Federal and State resources for hospital emergency planning and response
- Extensive planning references, including Internet links and sample plans and protocols
- Requirements and planning considerations for post-incident business recovery
- Moderated by experienced healthcare management and clinical professionals
